

## **WHAT IS HYCHILL HR 12 REFRIGERANT**

HR12 is an Australian made hydrocarbon refrigerant suitable for automotive air conditioning systems. HR12 is Australian made by HyChill specifically to perform in our climatic conditions. It is ozone safe and climate friendly "Greenfreeze" technology.

### **SOME INDUSTRY MYTHS AND LEGENDS EXPOSED**

#### **1. I'm not putting "L.P.G." into my air conditioning system, it will blow up or catch fire**

**WRONG!** There has been NO official record of any fire or explosion attributed to hydrocarbon refrigerant in vehicles anywhere in Australia. **There are several hundred thousand vehicles on Australian roads currently using this refrigerant, some since 1995.** The actual quantity of hydrocarbon refrigerant in the average size car is less than 300 grams. This is mixed with the lubricating oil AND considering the quantity of fuel and flammable products already on board, it's not an issue. The refrigerant is a highly refined hydrocarbon and is not 'L.P.G.' but a blend of naturally occurring gases in the hydrocarbon chain. Standard 'L.P.G.' carries a number of gases suitable for energy use only and is NOT recommended for use as a refrigerant by HyChill. HR12 has an 'odourant' and can easily be detected by smell.

#### **I can't use this refrigerant. The warranty on any replacement parts I fit to the system will be void.**

**WRONG!** HyChill Refrigerants warrant its product for a full 12 months against any faults or defects in your system directly attributable to the HyChill Refrigerant. A copy of this Warranty/Guarantee issued by HyChill Refrigerants is available from its distributors and appears on our customer information sheets. HyChill Refrigerants stand by their product and back up their statements IN WRITING.

HR12 offers superior performance as a carrier of lubricants and results in lower system head pressure. It is hard to argue that it can cause system damage over and above the currently specified refrigerant. The consumer benefits from certain warranties and conditions implied by Federal and State Legislation, which cannot be withheld - combined with the full 12 month HyChill warranty, HR12 IS the future.
